## Skills

### Backend

- Java
- Grails
- Node.js

### Frontend

- React
- Flutter

### Cloud

- Docker
- Azure
- Google

### Databases

- SQL
- Firebase

## Education

B.S.

Software Engineering

**Western Governors University**

May 2018 - November 2020

- Achieved 4 year degree in less than two by accelerating courses

Software Engineer with 4+ years of experience building Java-based backend and embedded systems for enterprise environments. Specialized in APIs, integrations, and internal tools that support large-scale device and cloud platforms. Comfortable owning services end-to-end from design through deployment.

## WORK EXPERIENCE

### Technical Integration Specialist

#### Xerox - Lexmark, Intl.

July 2022 - current Lexington, KY

- Designed and maintained Java/Grails backend services for enterprise multifunction printers, enabling secure integration and consolidating multiple cloud platforms.
- Built embedded software components supporting large-scale device fleets across diverse enterprise environments.
- Developed internal tools and automation that reduced troubleshooting time by and accelerated integration testing by 75%.
- Led deployments of print management solutions across dozens of customer fleets, reducing manual configuration time by ~30%.
- Collaborated with cross-functional teams to upgrade and support global print management systems with high availability requirements.
- Was selected for a Technical Leadership Mentoring program and excelled within the class.
- Recognized for innovative contributions during internal hackathons focused on cloud-connected product capabilities.

### Software Delivery - Freelance

#### 10th Planet Screen Printing

November 2020 Danville, KY

- Designed and built a mobile business application to centralize order management, customer data, and operational workflows. Reduced downtime by 35%

## PROJECTS

### Cottage Sourdough Bakery App

- Improved inventory efficiency by 50%
- Enabled customer metrics by tracking orders and improved reach

### Food Truck Management App Prototype

- Designed backend integrations supporting menus, scheduling, loyalty programs, and payments
- Implemented Flutter UI as a client for backend services
