I am a passionate developer with 4+ years of proven experience creating scalable apps and APIs across web, mobile, and enterprise print systems. Skilled in a wide array of tech with a focus on clean UI, backend reliability, and customer-first solutions. I am constantly challenging myself to learn new skills and improve existing ones.

WORK EXPERIENCE

Technical Integration Specialist
Lexmark, Intl.

📅 July 2022 - current   📍 Lexington, KY

- Developed and integrated Java/Grails-based software for enterprise multifunction printers, improving operations and enabling permission-based registration for 5+ cloud services.
- Install, upgrade and support on-premises fleet-wide print management solutions.
- Led deployments of print management solutions across client fleets; reduced manual configuration time by 30%.
- Support ongoing releases by maintaining compatibility with evolving hardware and security standards.

Graphic Designer
10th Planet Screen Printing

📅 April 2019 - January 2024   📍 Danville, KY

- Designed and built a mobile business app to streamline workflows, reduce costs, and centralize customer/order data.

Solutions Specialist
Verizon Wireless

📅 July 2014 - July 2022   📍 Lexington, KY

- Consistently performed in the top 10% of the company for multiple metrics including sales goals and customer satisfaction
